

## Alpha Aquila

Vanna is embarking on a 25-year long journey to the distant planet, Alpha Aquila. She has never traveled so far from home, far from her father and twin sisters but it is mandatory that she go. She is fulfilling an obligation, made by her grandfather, to repopulate a planet that was stricken with war and disease. It is a great honor to be entrusted with the responsibility of mothering an entire planet, but Vanna is nervous. Her overprotective father never allowed Vanna to get close to men on earth and she has never met her future husband. Will her new husband treat her with the care and tenderness that Vanna so desires? Will she ever be able to find the companionship that she was forbidden on Earth?
