

Cosmos and Karma: A Systematic Investigation of the Encyclopaedia of Abhidharma (Russian oriental studies) (Russian Edition)

This is a systematic analysis of the Buddhist post-canonical philosophy as represented in the Sanskrit treatise, Encyclopaedia of Abhidharma. This treatise is known as a basic source for the study of religious and philosophic views of the Hinayaya schools. Vasubandhu, the author of the treatise, was one of the most outstanding thinkers of the ancient and early medieval India. His treatise has been believed to be a model of the universal system of meanings that endows the Buddhist religious praxis with sacred and universal significance. Application of special structural-hermeneutic methods worked out by these Russian scholars allows them to analyse the post-canonical Buddhist philosophy with exceptional clarity. This volume is in Russian.
